### **DETAILED ACTION**

Applicant's submission filed on March 8, 2004 has been entered.

Claims 1-12 and 25-28 are cancelled.

Claim 13 is currently amended.

Claims 13-24 are pending and are examined.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

All previous objections and rejections not set forth below have been withdrawn.

### ***Claim Rejections - 35 USC § 112***

Claims 13-24 remain rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an isolated nucleic acid fragment having promoter activity comprising the nucleic acid sequence of SEQ ID NO:6 or of SEQ ID NO:14, as well as for methods of expressing sequences operably linked to said isolated nucleic acid fragment, does not reasonably provide enablement for an isolated nucleic acid fragment having promoter activity comprising the nucleic acid sequence of SEQ ID NO:15 or of SEQ ID NO:16. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims, for the reasons of record set forth in the office action mailed December 3, 2003.

Applicant's arguments filed March 8, 2004, have been fully considered but they are not persuasive.

Applicant argues that the rejection should be withdrawn in light of the amendment of claim 13, deleting reference to hybridizable fragments, and adding SEQ ID NOS: 15 and 16. Applicant further argues that that one skilled in the art would appreciate that SEQ ID NOS: 15 and 16 would retain promoter activity, since these sequences are similar to SEQ ID NOS:14 and 6 respectively. (reply pages 4-5)

The rejection is maintained because, as discussed previously at pages 4-5 of the office action mailed December 3, 2003, at pages 4-5 of the office action mailed May 22, 2002, and at page 5 of the office action mailed January 31, 2001, it is unpredictable whether an altered promoter polynucleotide, such as SEQ ID NOS: 15 and 16, would retain promoter function. An altered promoter polynucleotide would not predictably retain promoter function because even minor changes in the length or sequence of a promoter can potentially alter or eliminate both basal and tissue-specific promoter activity. Since promoters having a high degree of structural homology may or may not have functional homology, merely asserting that SEQ ID NOS: 15 or 16 share regions of structural similarity with another polynucleotide having promoter function, such as SEQ ID NOS:14 or 6, is not sufficient to enable promoter function for SEQ ID NOS: 15 and 16.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 1638

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
